

Dear Business Colleagues,

We are pleased to unveil a new Membrana logo. While the look of our Company identity is being changed, there will not be any changes to our business structures, management, or personnel.

Our new logo uses a graphic element that has a fluid motion that curves over and under MEMBRANA, representing both hollow fiber and flat sheet membranes that we develop and produce.

The top membrane element is shown in red to represent our Healthcare business. The lower membrane element appears in blue to represent our Industrial and Specialty Filtration business. The curved element and color transition through the MEMBRANA name also depicts our core competencies - Membrana's membrane technology improves fluid quality after passing through our products.

Our new logo will be transitioned onto literature, packaging and product labeling over time.

Thank you,
Your Membrana Support Team
